# Campus Ambassador Guide

How you earn with ABS Vendor — and how to actually get paid.

Rates current as at 15 September 2026. This guide is generated from the live programme settings.

This is not a one-off cash reward. You set it up once, and it keeps paying you every time the people you referred buy data — for 12 months, whether you are awake or not.

## 1. The two ways you earn

### A. A bonus for every person who becomes a real user

When someone signs up with your link and then spends ₦1,000 on data (across any number of purchases), you are paid a one-off bonus of **₦150** at the starting level — more if you choose a higher reward level, see section 2.

Sign-ups alone do not pay. That rule is what keeps the programme free of dummy accounts, and it is the reason we can afford to pay properly for real ones.

### B. A share of everything they buy afterwards

After that, you earn **30% of the profit** on every single data purchase they make, for **12 months**. In practice that is roughly **₦12 for every ₦1,000** of data they buy.

You do not have to remind them, chase them, or even know it happened. It lands in your dashboard on its own. We pay it out of what we actually earned on the sale, which is exactly why it can keep running instead of drying up.

## 2. Choose your reward level

You decide how hard the bonus is to earn. A higher level asks the person you referred to spend more before it pays — and pays you a better rate for it. Change it any time from your dashboard; it applies to people who join *after* you switch, so nobody already working towards a target has the goalposts moved.

| Level | They must spend | You earn | Rate |
|---|---|---|---|
| **Starter** | ₦1,000 | **₦150** | ₦150 per ₦1,000 |
| **Steady** | ₦2,000 | **₦320** | ₦160 per ₦1,000 |
| **Serious** | ₦3,000 | **₦510** | ₦170 per ₦1,000 |
| **Committed** | ₦5,000 | **₦900** | ₦180 per ₦1,000 |

## 3. What this adds up to

An example, using the rates above. Say you bring **30 people** and each buys about **₦3,000** of data a month:

| What | Amount |
|---|---|
| Bonuses (30 × ₦150) | **₦4,500** |

| | |
|---|---|
| Your share of their data, every month | **₦1,080** |
| **Over 12 months, adding nobody new** | **₦17,460** |

An illustration, not a promise. What you actually earn depends on how many people you bring and how much they really buy.

## 4. Getting your money

- A bonus is **Pending** for 2 days, then becomes **Available**.
- Data commission is Pending for 24 hours, then Available.
- Your **first** cash-out needs an available balance of **₦5,000**.
- After that, the minimum is **₦500**, any time you like.
- Money moves into your ABS Vendor wallet. From there, withdraw to your bank or spend it on the app.

> **Limits worth knowing.** One referred person can generate up to ₦500 for you per month. The programme pays a maximum of ₦50,000 per ambassador per month.

## 5. Milestones

On top of everything above, crossing a milestone unlocks a one-off reward, credited straight away:

| Badge | Qualified referrals | Reward |
|---|---|---|
| **Bronze** | 10 | Badge and status |
| **Silver** | 50 | **₦2,000** |
| **Gold** | 100 | **₦10,000** |

## 6. How to actually make this work

- **Share where people already buy data.** Class groups, hostel groups, your status. Not strangers.
- **Help the first purchase happen.** Most people stall at funding the wallet. Walk one person through it and they are worth 12 months of commission to you.
- **Bring people who actually use data.** One heavy user beats five who never buy.
- **Then leave it alone.** There is no monthly target and nothing resets. Someone you signed up in your first week is still paying you months later.

> **Fair play.** The system automatically disqualifies self-referrals — the same device as your own account, the same BVN, or the same funding source. Genuine friends and family on their own phones are completely fine. Disqualified referrals lose any commission attached to them, and a purchase that gets refunded has its commission reversed, since there was no sale to share.

> **Your first three steps**
> 1. Create your ABS Vendor account if you have not yet — your ambassador profile links to it, and without one there is no wallet for your earnings to land in.
> 2. Join the ambassador WhatsApp community for flyers, captions and weekly strategy: https://chat.whatsapp.com/IRgToAO5CR022IPtQVaJZN

3. Open your dashboard at absvendor.com/dashboard/ambassador.php, copy your link, and share it once.
